

GOLD COAST 128WP CRUISING CATAMARAN

DESIGN BRIEF

What next? Why not? It is really obvious to us.

Proposed 125' wave-piercing power cat envisioned by Warren Mosler, the owner of our 50' wave-piercer *Knot my Problem*. This idea was easy whilst co-owning a 125' mega-yacht that inhaled fuel, never got up and planned as specified and basically got bashed in the rough Caribbean conditions. Mr. Mosler has never needed the approval of anyone else and so it would go with this vessel, if he ever commissions it. Won't it look sweet all lit up on the docks at Monaco?

SPECIFICATIONS

Length	128'
Beam	40'
Displacement	75,000 +lbs
Cruise Speed	17 knots
Top Speed	25 knots
